**Subject:** RE: SWD Permitting question

Sally,

The 10 Barrels of fluid injected in April, 2020 for the Dagger Draw SWD Well No. 1 (API 30-015-25003); satisfies the injection timeframe condition stipulated in paragraph 14 of Administrative Order SWD-1856.

Thanks, and please feel free to reach out for any additional permit guidance by emailing OCD's engineering staff at:

[OCD.Engineer@state.nm.us](mailto:OCD.Engineer@state.nm.us)

Regards,

**Dylan Rose-Coss**

**Subject:** [EXT] SWD Permitting question

we are working with Tactical on there SWD well

<https://wwwapps.emnrd.state.nm.us/ocd/ocdpermitting/Data/WellDetails.aspx?api=30-015-25003&GISReferenceSource=ArcGISOnline>

They are working on rehabilitating it and I know that the permit expires a year from the last date that water has been injected in the well. but is there a minimum amount of water that needs to be injected? Is the 10 Barrels that was injected in April enough to reset the clock on the permit expiring?

Thanks  
Sally
