RE: Administrative Order SWD-2004; Extension of Deadline to Inject
Well: McCrae SWD Well No. 1 (API 30-015-Pending)
Located: Unit A, Sec 33, T19S, R28E, NMPM, Eddy County, New Mexico
Order Date: November 19, 2019
Injection formations: Devonian and Silurian formations; 12,094 feet to 14,294 feet

Dear Ms. McKee:

Reference is made to your September 2, 2020 request on behalf of Solaris Water Midstream, LLC (the "operator") to extend the deadline stipulated in the above titled order to commence injection for the above referenced well for reasons outlined in your correspondence. The current deadline date to commence injection under said order is one year after issuance of the order: November 19, 2020.

It is the Division's understanding from your correspondence that since the date of issuance of this permit, no additional wells that penetrate the approved injection interval were drilled in the one-mile Area of Review (AOR). Additionally, two new affected parties have been identified in the AOR and have been notified of the extension request. Therefore, the extension request could be reviewed administratively for approval.

The Division finds that for reasons you have stated, the granting of this request to extend this administrative order is in the interest of conservation, will prevent waste, and will protect the environment. Therefore, the deadline to commence injection for the existing order is hereby extended until November 19, 2021.

All requirements of the above referenced administrative order and agreements in the application remain in full force and effect. Any additional extension of the deadline to commence injection for this administrative order will not be considered unless the operator has already commenced drilling of the referenced well. Otherwise, the injection authority shall expire under the terms of the extended administrative order and the operator shall be required to submit a new application to obtain injection authority for the referenced well.

ADRIENNE SANDOVAL
Director
