---

Hello Mr. McClure,

Attached you will find the signed statement from our landman. On the BTU estimate for pool 3740, we have confidence that we will see a BTU factor of approximately 1.3.

It is very much our hope that these items are sufficient for the approval of our application. We also appreciate your time and attention to this application!

Thank you,

Marshall Bates

Hello Mr. Bates,

I am reviewing the downhole commingling application for the Winningham # 9 (DHC-5087) operated by FAE II Operating, LLC (329326).

Please submit an estimate of the BTU value for the gas within pool 37240 for this well.

Please submit a signed statement from your landman or other qualified person attesting that ownership is identical between these two pools within this well.
