---

Philip,

As a follow up to our conversation, Intrepid is requesting that the Intrepid SWD No. 2 salt water disposal well be permitted by OCD as a UIC Class II well which will receive oil and gas related and exploratory production wastes only (i.e. any UIC Class II fluid or oil field waste defined in [19.15.2.7](#) NMAC). We apologize for any confusion. Please let me know if you need anything further from us in order to proceed.
