Advanced Wireless Communications, LLC plans to bring all wells above into production before the end of November, 2021. With the Exceptio Advanced Wireless Communications, LLC plans to produce these wells for a minimum of 1 year and then reevaluate each well's economic via viable to do so.

The exact timeline and order in which these wells will be produced may change if and when it is found that the above ground equipment nee the Ora #8 that have downhole problems, will be repaired and then brought back into production.

Summary Previous ACO's

NMOCD - ACOI-371

7 Inactive wells brought into production per the plan, all wells still producing and in Active status.
