7. Lease Name or Unit Agreement Name DHY B State SWD
8. Well Number 1
9. OGRID Number 119305
10. Pool name or Wildcat SWD; Cisco-Canyon (96186)

SUNDRY NOTICES AND REPORTS ON WELLS (DO NOT USE THIS FORM FOR PROPOSALS TO DRILL OR TO DEEPEN OR PLUG BACK TO A DIFFERENT RESERVOIR. USE "APPLICATION FOR PERMIT" (FORM C-101) FOR SUCH PROPOSALS.)	
1. Type of Well: Oil Well <input type="checkbox"/> Gas Well <input checked="" type="checkbox"/> Other SWD	
2. Name of Operator Ray Westall Operating, Inc.	
3. Address of Operator P.O. Box 4, Loco Hills, NM 88255	
4. Well Location Unit Letter L : 1980 feet from the South line and 990 feet from the West line Section 11 Township 19-S Range 28-E NMPM County Eddy	
11. Elevation (Show whether DR, RKB, RT, GR, etc.) 3477' GR	

12. Check Appropriate Box to Indicate Nature of Notice, Report or Other Data

NOTICE OF INTENTION TO:		SUBSEQUENT REPORT OF:	
PERFORM REMEDIAL WORK <input type="checkbox"/>	PLUG AND ABANDON <input type="checkbox"/>	REMEDIAL WORK <input type="checkbox"/>	ALTERING CASING <input type="checkbox"/>
TEMPORARILY ABANDON <input type="checkbox"/>	CHANGE PLANS <input checked="" type="checkbox"/>	COMMENCE DRILLING OPNS. <input type="checkbox"/>	P AND A <input type="checkbox"/>
PULL OR ALTER CASING <input type="checkbox"/>	MULTIPLE COMPL <input type="checkbox"/>	CASING/CEMENT JOB <input type="checkbox"/>	
DOWNHOLE COMMINGLE <input type="checkbox"/>			
CLOSED-LOOP SYSTEM <input type="checkbox"/>	Install LINER; Recomplete and Configure for SWD <input checked="" type="checkbox"/>	OTHER: <input type="checkbox"/>	

13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 19.15.7.14 NMAC. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

**Conduct Safety Meeting Prior to Start of All Operations SWD per OCD Permit SWD-1582**

**Casing Modification**

During reentry, it was discovered that the existing 5.5-inch casing was excessively corroded or otherwise damaged across extensive intervals. RWO would like to line the wellbore from surface to TD.

Install 4.5-inch 11.6# FJ liner (P-110) from surface to TD; ~10,030' +/- w/ DV tool set ~6500'. Cement to surface in 2 stages: 1st Stage; 94 sx class 'H' cement w/ 25% excess. Stage 2; 219 sx class 'C' w/ 50% excess.

Note: Per division order SWD-1582, existing perfs from 8870' to 8942' will effectively be squeezed by 1st stage cement job.

Set CIBP ~10,030' and cap w/ 35' cement. Shoot injection perfs as specified between 9600' and 9950'. RIH w/ 2.375" IPC tubing and set packer ~9500'+. Conduct OCD witnessed MIT and commence injection.

[Workover]  
Spud Date:

3/15/2022 - Rig is on Location

Rig Release Date:

~4/05/2022

I hereby certify that the information above is true and complete to the best of my knowledge and belief.

Ben,

Submit a sundry with the rig procedure including the 4 ½" liner and 2 3/8" tubing. Just let me know the Action ID and I can process the paperwork from there.

Regards,

**Dylan Rose-Coss**

**Subject:** [EXTERNAL] RE: Ray Westall's DHY-B SWD...

CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments.

Good morning gentlemen,

I am again seeking a reply. Perhaps there is some other mechanism, protocol or person's attention I should be aware of.

I understand the OCD staff is busy and many of us in the field are trying to remain so. RWO has a workover rig on the subject well and we are seeking approval to run the liner as explained and would represent another quarter million-dollar investment. We had made the request in a timely manner pursuant to activities in the field in an attempt to not waste resources or capital – RWO is now dangerously close to that threshold as 10 working days have passed since our initial request.

We would appreciate a reply with approval to move forward as described earlier OR, please let us know what the correct route is to get some action taken on the request.

Thank you for your time,  
Ben

**Subject:** Ray Westall's DHY-B SWD...

Gentlemen:

Ray Westall has been on the workover to convert its DHY State B SWD #1 (30-015-21971) per SWD-1582. The operations have been challenging as the well pluggers had dropped all sorts of junk in the hole including junk tubing, anchors and the like – it was a mess. However, they've finally reached TD and the operations super, Donnie Mathews called and said the casing appears to be in bad enough shape that they'd like to install a 4.5-inch liner from surface to TD ~10,000'+. Mr. Mathews has ordered the liner and the pipe suppliers said it would take them a week to 10 days to thread the pipe and get it delivered.

Mr. Mathews called Gilbert Cordero for guidance and Gilbert asked that we contact Santa Fe engineering to get the initial approval for whatever UIC ramifications there might be. I can't really think of any as pipe sizes will be going down; including the tubing which would be 2.875" or smaller rather than the originally permitted 3.5".

The permit mandates that old perms from 8870 feet to 8942 feet be squeezed – that will effectively be accomplished by the installation of the liner which will be cemented and circulated to surface.

The interval will be shot exactly as permitted. Maximum injection pressure will not change but, daily rates may be reduced obviously due to the smaller tubulars.

Ray Westall Operating, Inc. will submit the required sundry(ies) for installation of the liner, ultimately moving forward to the pre-injection, witnessed MIT.

Please let me know if additional information is needed or, with your approval, we'll move forward with a sundry intent for this casing modification.

Thank you for your attention to this matter.

Regards,  
Ben
