If a Watercourse was Impacted, Describe Fully.\*  
N/A

Describe Cause of Problem and Remedial Action Taken.\*

Hole on bottom or side of oil tank. The remaining oil in the tank will removed to repair or replace tank.

Describe Area Affected and Cleanup Action Taken \*

The spill area was contained inside the facility firewalls. The spill area will be scraped and sampled for evaluation. The excavated soil will be transported to proper disposal. Based on the NMOCD RRAI, either a work plan or a closure report will be submitted for review and approval.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
