*From R Cone - up of Record*

W/K Land Company  
Southern California 14 Federal #1  
Unit H, Section 14, Township 19 South, Range 30 East  
Eddy County, New Mexico

Mike and Bob,

Tetra Tech is preparing to start the soil remediation on the above reference site on Wednesday (9-14-11). Sorry for the short notice, the contractor called and the equipment became available for tomorrow. Due to the dense caliche formation, Tetra Tech will supervise the removal of approximately 2.0' of soil from the spill area using a backhoe. Once completed, the excavation bottom will be sampled for TPH, BTEX and chlorides. Tetra Tech will also perform field chlorides for evaluation. Based on the field chlorides, backhoe trenches may be installed to define the chloride impact, if necessary. The excavation will be left open until the results are evaluated. In addition, the contractor has inspected both tanks onsite and found no fluid inside the tanks. Prior to excavating the soil, the leaking tank will be moved to access the impacted soil under the tank. Tetra Tech will also notify you during each phase of the remediation project for inspection of the site. We will notify you on any schedule changes or delays on the project. Let me know if you need additional information, thanks
