Subject: Turner B 87 spill map, spill report, and archeology issues
Attachments: Turner B 87-spill map-082411.jpg

To All,

Attached you will find the spill map for the Turner B 87 flowline spill. This spill is in an unsurveyed archeological area and adjoins an ineligible site boundary. Staff archeologists have reviewed the case and have stipulated the following:

1. An archeological survey is required prior to deploying cleanup operations.

I do not yet have a spill report for this event. The spill report for this event is due in our office by 09/02/11. Failure to submit the required report by the due date will result in an issuance of an Incidence of Noncompliance for failure to comply with requirements specified in NTL-3A.

Thank you for your attention to these concerns,

Terry Gregston
