Mike,

Per your recommendations, Yates Petroleum Corporation will rip, disk and aerate the areas that show leaching of hydrocarbons. When completed I will notify you. Yates will then spread the stockpiled topsoil to backfill areas to grade and prepare for seeding. Yates will then submit a Final C-141 and documents requesting closure.

Thank you for your assistance with this site and remediation process.

Mike,

The ripping and disking work has been completed.

Thank you.
