NATURE OF RELEASE

Type of Release Gas and Oil	Volume of Release 420 Mscf gas 15 bbls oil	Volume Recovered 0
Source of Release Pipeline	Date and Hour of Occurrence 28Jun11 1715hrs	Date and Hour of Discovery 28Jun11 1715hrs
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Mike Bratcher NMOCD	
By Whom? Johnnie Bradford	Date and Hour 30Jun11 1100hrs	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse. N/A	

If a Watercourse was Impacted, Describe Fully.*
N/A

Describe Cause of Problem and Remedial Action Taken.*

A DCP pipeline M-28 was struck by a contractor just west of Duvall Shaft Road while the contractor was mining caliche from a State/BLM owned pit at that location. The resulting release from the line generated ~15 bbls of oil sprayed over 1.5-2 acres and ~420 Mscf of natural gas released into the atmosphere.

The pipeline segment was immediately isolated from service by DCPM field personnel. The affected area was elevated and a remediation contractor consulted to provide clean up services. The gouge in the pipeline was repaired as safely and expeditiously as possible by contracted Roustabout crews.

Describe Area Affected and Cleanup Action Taken.*

The area to the north of the point of release affected by the overspray was heavily disked/tilled to blend the surface hydrocarbons. The two small arroyos to the north were treated with a heavy application of MicroBlaze to aid in the remediation of the hydrocarbons. The highly saturated soil at the point of release was excavated and transported to a division approved disposal facility. Soil samples were obtained and analyzed for Chlorides, TPH, and BTX. Lab analysis was presented to NMOCD's Mike Bratcher. All levels were at or below closure level limits. Closure approval was requested and approved. The excavated area was backfilled using clean material from the caliche pit and the area contoured to match the surrounding terrain. All work was conducted in accordance with the NMOCD approved work plan.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
