Re: Application of Chesapeake Operating, Inc. for Amendment to Administrative Order NSL-6458 Approving An Unorthodox Well Location for the PLU Big Sinks 2 24 30 USA Well No. 1H in Section 2, Township 24 South, Range 30 East, NMPM, Eddy County, New Mexico.

Dear Ms. Bailey:

By Administrative Order NSL-6458 dated August 30, 2011, the Division approved an unorthodox well location for Chesapeake's PLU Big Sinks 2 24 30 USA Well No. 1H located in Section 2, Township 24 South, Range 30 East, N.M.P.M., Eddy County, New Mexico. Under the NSL Order, the well was to be drilled in the Bone Spring formation at a surface location and a penetration point 1980 feet from the North line and 200 feet from the West line with a terminus location 1980 feet from the North line and 100 feet from the East line of Section 2. Notice was provided to the affected parties and no objection was received by the Division prior to the issuance of Order NSL-6458.

As reflected on the attached amended C-102 report, Chesapeake has since drilled the well to a total depth of 14,209 feet and determined that the terminus of the well is actually 93 feet instead of 100 feet from the East line of Section 2. A frac plug is set at 14,200 feet and the perforations remain 128 feet from the East line of Section 2.

Chesapeake respectfully requests that Administrative Order NSL-6458 be amended to reflect approval of a terminus location 93 feet instead of 100 feet from the East line of Section 2.
