**Subject:** RE: GW-283 Jal South compressor station Discharge permit

Ms. Slade:

Based on the information that you have provided, OCD has determined that the proposed addition of the amine treating system does not significantly alter the operations at your compressor station. Therefore, no modification to your discharge permit is required and your proposed modification is hereby approved.

Please call me at 505-476-3488 with any questions or issues.

**Subject:** GW-283 Jal South compressor station Discharge permit  
**Importance:** High

Thank you so much in speaking with me this morning Glen I appreciate your assistance,

In reference to our conversation this morning on the Southern Union Gas Services Jal South Compressor Station Permit # GW-283 as per rule 20.6.2.3107 Monitoring, Reporting, and other requirements subpart C condition 5

Southern Union Gas Services would like to request approval of installing a 300gpm amine treating system just North of its Jal south compressor station located 3 miles south of Jal, NM just East of Hwy. 18. The modification to this facility should not result in the production increase or process modification that would result in any significant modification in the discharge of water contaminants.

Thank you,

Rose L. Slade
