If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\* A 2 3/8" flow developed a leak due to external corrosion, the line was excavated and a repair clamp was placed on the leak.

Describe Area Affected and Cleanup Action Taken.\* The spill affected approximately 1000 sq.ft. of caliche well pad and lease road. The free standing fluid was picked up with a vacuum truck and the saturated soil was scraped up and stockpiled on the well pad. The area will be delineated and a remediation plan will be submitted in accordance with the NMOCD recommended guidelines.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
