RE: Oil & Gas Facilities Questionnaire for Determination of a WQCC Discharge Permit, Jackson Compressor Station, Eddy County, New Mexico.

Mr. VonGonten:

As requested in correspondence dated May 10, 2011 available on the New Mexico Oil Conservation Division (OCD) website, DCP Midstream (DCP) hereby submits for your review and consideration a completed Oil & Gas Facilities Questionnaire for Determination of a WQCC Discharge Permit for the Jackson Compressor Station. At the request of OCD, DCP submitted an application for a new discharge permit for Jackson Compressor Station during February 2010. The application for Jackson Compressor Station submitted by DCP is present on the OCD website (GW-403), but it appears that no draft or final permit for this facility was ever issued. Per your recent correspondence, please review the enclosed questionnaire for discharge permit applicability at this facility.

Please send all correspondence regarding this questionnaire to the attention of Keith Warren, DCP Midstream, 370 17th Street, Suite 2500, Denver, CO 80202.

Should you have questions or need further information please call me at 303-605-1936. Thank you very much for your consideration and assistance with this matter.

Sincerely,

DCP Midstream

Keith Warren, P.E.

Oil & Gas Facilities Questionnaire for Determination of a WQCC Discharge Permit

Only Water Quality Control Commission- regulated systems will be incorporated into the OCD's WQCC Permits, while OCD regulated systems will be handled under separate permit(s). A current discharge permit is valid until its normal expiration date or November 15, 2012, whichever is later. All facilities with processes subject to the Water Quality Act must have permits in place by November 16, 2012. H2S Contingency Plans; pits, ponds, above and/or below-grade tanks; waste treatment, storage and disposal; and landfarms and landfills may require separate permitting under the OCD Oil, Gas, and Geothermal regulations.

Proper completion and timely submission of this questionnaire is requested for all facilities with discharge permit expiration dates before November 15, 2012. Please complete and submit a separate questionnaire for each facility before July 15, 2011.

 Name of the owner or operator of the facility DCP MIDSTREAM, LP Point of contact Name KEITH WARREN Telephone (303) 605-1936 Email KWARREN@DCPMIDSTREAM.COM Mailing address 370 17TH STREET, SUITE 2500, DENVER, CO 80202 JACKSON BOOSTER STATION Facility name Facility location Unit Letter, Section, Township, Range N/2, SEC 28, T17S, R29E Street address (if anv) Gas Plant Compressor Facility type Refinery Crude Oil Pump Station Injection Well Service Company Abatement Geothermal Other (describe) Current and Past Operations (please check all that apply) Impoundments **Treatment Plant** Waterflood Disposal Well Brine Well Wash Bay

May 12, 2011 Page 2 of 3 Steam Cleaning **Groundwater Remediation** X Active Facility Status Idle Closed • Does this facility currently have a discharge permit? If so, what is the permit number? A NEW APPLICATION WAS SUBMITTED IN FEBRUARY 2010 (GW-403). NO DRAFT OR FINAL PERMIT WAS EVER ISSUED TO DCP MIDSTREAM BY NMOCD. Are there any routine activities at the facility which intentionally result in materials other than potable water being released either onto the ground or directly into surface or ground water? (This includes process activities, equipment maintenance, or the cleanup of historic spills.) Yes If so, describe those activities including the materials involved, the frequency of discharge, and the estimated volume per discharge event. NOT APPLICABLE • What is the depth below surface to shallowest ground water in the area? 210 FEET, 1.5 MILES AWAY Are there any water supply, groundwater monitoring, or recovery wells at the facility? Water supply Monitoring Recovery If these wells are registered with the Office of the State Engineer (OSE), what are the OSE well numbers? NOT APPLICABLE Are abatement actions ongoing? NO · Are there any active or inactive UIC wells present as part of the federal Underground Injection Control program associated with this facility? Yes If so, what are the API numbers assigned to those wells? NOT APPLICABLE X No Are there any sumps at the facility? | | Yes Number of sumps with volume less than 500 gallons Use and contents Is secondary containment incorporated into the design? No Number of sumps with volume greater than 500 gallons Use and contents

Yes

No

Is secondary containment incorporated into the design?

Oil & Gas Facilities Inventory Questionnaire

Oil & Gas Facilities Inventory Questionnaire May 12, 2011 Page 3 of 3

• Does the facility incorporate any underground lines other than el freshwater, natural gas for heating, or sanitary sewers?	ectrical conduits,
If so, what do those buried lines contain? PROCESS WASTEWATER AND ENVIRONMENTAL DRAIN PIPING, NATURAL GAS INL	ET AND OULET
PIPING, FACILITY PROCESS PIPING	

THIS FORM IS DUE TO THE OIL CONSERVATION DIVISION BY JULY 15, 2011.

Questions? Please contact Glenn VonGonten at 505-476-3488 or Carl Chavez at 505-476-3490.

Thank you for your cooperation.
