If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

A faulty ball valve at the filter pot caused the release of fluid. The faulty ball valve has been replaced.

Describe Area Affected and Cleanup Action Taken.*

Initially 20bbls were released and we were able to recover 19bbls with a vacuum truck. This facility is lined with a 40mil plastic liner. All standing fluid has been removed and clean gravel has been added as necessary. The tank battery has been returned to its prior condition.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
