| Describe Cause of Problem and Remedial Action Taken.* On February 15, 2012 approximately 20 bbls of oil was sprayed from the site emergency vent due to pipes having clogging the blowcase dump valve. The oil impacted an area down wind of the vent stack. The affected area is a plume shape beginning at the corner of Parkway booster and spreading east for ~600 ft. | | |
| Describe Area Affected and Cleanup Action Taken.* Operations supervisor contacted on remediation crew (Hungry Horse) to immediately start the clean up due to the livestock in the area. Contractor is making an emergency one call and as soon as it is good we will contain the worst part of the spill with fencing to avoid injury to livestock. | | |

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
