Subject: ROC - BD N-18 BGT (1R-500) Potential Groundwater Impact
Attachments: BD N-18 BGT (1R-500) Site Map.jpg

Mr. Glenn von Gonten,

Rice Operating Company (ROC) hereby notifies the NMOCD of groundwater impact at the BD N-18 BGT (1R-500) site, located in Unit N, Section 18, T22S, R37E. A near-source monitoring well confirmed impact to groundwater from the former below grade tanks (BGT). The installation of an up-gradient monitoring well also confirmed groundwater impact from an unknown source up-gradient of this site. Depth to groundwater at this site is approximately 101 ft below ground surface (bgs). Please contact Hack Conder at (575)393-9174 if you have any questions or require any additional information.

Thank you.
