Subject: Koonunga Hills BGX Fed #1 #2 Release

Mike,

As per our conversation on March 22, 2012. All evaluations show no spill occurring on the Koonunga Hill BGX Battery contained within the berm breached the liner. It appears the lost five barrels was an over estimate on the pumpers behalf. I would like to request closure on the Feb 7, 2011 Feb 10, 2011 release.

Thank you,

Mr. Bratcher:

We had a second release at the Koonunga Hills BGX Fed #1. This was related to the recent freeze this week. In addition to this release we had the main waterline, from this location, break in several places. All the wells were shut in at the time. So we are currently evaluating the line to see if we lost anything of a reportable quantity. I will keep you posted on that. Below is the information for the second release on the Koonunga Hills BGX Fed #1.

Koonunga Hills BGX Fed #1
Section 19, Township 22 South, Range 25 East
Eddy County
Date of Release: 2/10/2011
Approximately 75 barrels of PW were released 70 barrels recovered
Cause of release has been isolated and repairs are in progress

If you should have any questions please feel free to contact me at the number below.
