Describe Area Affected and Cleanup Action Taken.*					
Initially 20bbls of produced water was released from the Durco pump and we were able to recover 19bbls with a vacuum truck. The entire release was contained inside the dike walls of the facility, which is lined with a 40 mil plastic liner. Contaminated gravel has been removed and replaced with fresh gravel where necessary. This location has been returned to its prior condition.					
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOC rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOC marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOC acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
