Describe Cause of Problem and Remedial Action Taken.*

Flowline ruptured in the pasture. The well was shut in and crews were dispatched to excavate contaminated material and make necessary repairs and remedial steps.

Describe Area Affected and Cleanup Action Taken.*

An approximate size of 50' x 50' was impacted. The impacted area is located in the pasture northwest of well. Soil from the pooling areas was excavated and disposed of at an NMOCD approved facility. Vertical and horizontal delineation samples will taken and analysis ran for TPH and BTEX once all contaminated material has been removed. Chlorides analysis upon request. Depth to Ground Water: >100' (approx. 305', per New Mexico State Engineers Office); Wellhead Protection Area: No; Distance to Surface Water Body: >1000'; SITE RANKING IS 0. Based on site ground water quality and enclosed analytical results.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
