Good morning Mike Bratcher

Per our teleconference this morning, you stated that there was no need for ETNM/WEE Inc. to come into your office as of yet until both pit areas have been properly delineated both vertically and laterally. Vertically being that both pit areas will have a bore at the center of each pit sampled, field titrated to clean plus one more sample thereafter, with lab confirmations, and laterally. Once this accomplished all info gathered will then be brought to you for review and acceptance or rejection of protocol.

If you have any questions or comments please don't hesitate to call or email me.

Thank you very much and have a nice day.

Roy R. Rascon
President / Project Manager
Earth Technologies of New Mexico Inc. / Whole Earth Environmental Inc.
