Subject: Donahue Federal SWD #1 (2RP-1107)

Mike,

Per the April 11, 2012 Form C-141 Initial Report, the following actions have taken place. Impacted soils (total of 6" from production pad) were excavated and taken to an NMOCD approved facility. Initial vertical/horizontal delineation samples were taken on 5/31/2012 (samples were tested at an NMOCD approved laboratory). Because of a layer of rock just below the surface, deeper delineation was not possible by hand. Below are the analytical results. Yates would like to request these results be accepted for closure.

Analytical Report- 1206016	Sample Area	Sample Date	Sample Type	Depth	BTEX	GRO	DRO	TOTAL	Chlorides
Comp-00.5	Release Area	5/31/2012	Comp/Auger	6"	ND	ND	300	300	800

Site Ranking is Zero (0). Depth to Ground Water >100' (approx. 268', NMOSE & approx. 225', per Trend Map).

All results are ppm. Chlorides for documentation.

Released: 1 B/O & 70 B/PW; Recovered: 1 B/O & 65 B/PW. Release Date: 4/1/2012

Thank you.

Mike,

I will submit a Form C-141 Final Report and supporting documentation requesting closure.

Thank you.

Bob,

I can close this out based on the analytical data and the rock encountered.
