I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Mike,

Please find the initial C-141 for the Old Indian Draw unit 24, also attached is the Lab data. We have excavated 1.5 feet of soil from inside the firewall, the highlighted results in the data has been excavated and hauled away to Lea Land. Vertical delineation cleans up and we would like your approval to backfill the site. If you have any questions please let me know.

Thanks,
