Cause of problem: Disposal pump plugged up and pushed water into the oil tank causing fluids to reach a level in the tank where holes exist.

Describe Area Affected and Cleanup Action Taken.\*

Clean up action: A vacuum truck was dispatched to suck up any pooled oil. A backhoe was dispatched to scrape up leak affected earth, which will be hauled to a disposal facility

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
