Re: Application for Unorthodox Well Location
Lee Federal Well No. 51
API No. (30-015-40034)
1620' FSL & 330' FWL (Unit L)
Section 17, T-17 South, R-31 East, NMPM,
Eddy County, New Mexico

Dear Ms. Bailey:

Pursuant to Division Rule 19.15.15.13, Apache Corporation ("Apache") respectfully requests administrative approval of an unorthodox oil well location for its proposed Lee Federal No. 51. This well will be drilled as a development oil well in the Cedar Lake Glorieta-Yeso Pool (96831).

The proposed Lee Federal No. 51 will be dedicated to an existing standard 40-acre oil spacing and proration unit in the Cedar Lake Glorieta-Yeso Pool comprising the NW/4 SW/4 of Section 17. This unit is currently dedicated to Apache's: i) existing Lee Federal No. 30 (API No. 30-015-32296) located at a standard well location 1650 feet from the South line and 865 feet from the West line; and ii) existing Lee Federal No. 31 (API No. 30-015-32297) located at a standard well location 2310 feet from the South line and 330 feet from the West line.

The Cedar Lake Glorieta-Yeso Pool is currently governed by Division Rule 19.19.15.9 which requires standard 40-acre oil spacing and proration units with wells to be located no closer than 330 feet to the outer boundary of the spacing unit.

The attached vicinity map shows that the proposed unorthodox well location is necessary in order to avoid an existing pipeline.

The affected offset tracts are the SW/4 SW/4 of Section 17, Township 17 South, Range 31 East, and the SE/4 SE/4 of Section 18, Township 17 South, Range 31 East, NMPM (see attached plat). These affected offset tracts are operated by Apache in the Cedar Lake Glorieta-Yeso Pool (See existing Lee Federal Wells No. 32 and 34 and

proposed Lee Federal Wells No. 43 and 62 in the SW/4 SW/4 of Section 17, and existing Tony Federal Wells No. 14 and 18 in the SE/4 SE/4 of Section 18). The working interest ownership between the drill tract and the affected offset tracts is common. Consequently, notice of this application is not required to any party.

Attached is a Form C-102 showing the proposed well, spacing unit and other existing wells in the spacing unit, a map showing the affected offset acreage, and a vicinity map.

In summary, approval of the application will provide Apache Corporation the opportunity to recover additional oil and gas reserves from the Cedar Lake Glorieta-Yeso Pool underlying the NW/4 SW/4 of Section 17 that may otherwise not be recovered by the existing wells, thereby preventing waste, and will not violate correlative rights.

If you should have any questions, please call me at (505) 690-9453.

Sincerely,

David Catanach, Agent
