Describe Cause of Problem and Remedial Action Taken.* An unknown source caused an estimated 8 bbls of oil and produced water to leak onto the ground. 0 bbls were recovered.				
Describe Area Affected and Cleanup Action Taken.* The area affected was approximately 20' x 20' and 8' x 104'. Remediation will be performed according to an OCD and BLM approved remediation plan.				

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject: RE: Old Ranch Knoll 8 Fed #7- Initial C-141

Kathy,

I have received your report and I will be the point of contact for this event. We will need to delineate the area on the pad. The area off the location will have shallow soils, not much to delineate(solid rock). Will need samples to know what we are dealing with. Arch is not an issue, the area falls within existing surveyed space. Provide a plan based on the findings.

Thanks,

J. Amos
