Dear Mr. Kacir:

Reference is made to your recent application for an amendment to Division Order No. DHC-1019 dated May 11, 1999, which order authorized the downhole commingling of Tubb Oil & Gas, Drinkard and Wantz-Abo Pool production within the wellbore. It is our understanding that the Abo tested stronger than the original application estimates and the Tubb tested significantly lower than the pre-workover allocated volume.

It appearing that the subject well qualifies for approval for such amendment pursuant to the provisions of Rule 303.C., and that reservoir damage or waste will not result from such downhole commingling, and correlative rights will not be violated thereby, you are hereby authorized to commingle the production as described above and any Division Order which authorized the dual completion and required separation of the zones is hereby placed in abeyance.

In accordance with the provisions of Rule 303.C., the daily allowable producing rates from the well are hereby established as follows:

Oil 142 B/D

Water 284 B/D

The maximum amount of gas which may be produced daily from the well shall be determined by Division Rules and Regulations or by the gas allowable for each respective prorated gas pool as printed in the Division's Southeast Gas Proration Schedule.

Assignment of allowable to the well and allocation of production from the well shall be on the following basis:
