David, we will verify the BHLs and revise the area of review. I will send this info to you ASAP. FYI, I am waiting on info from someone who is on vacation, so there will be a short delay. Thanks, Stan

Subject Application

Stan,

I am currently reviewing your application to inject into the Red Hills Unit 801 & 904. I've got a couple of questions. I'm confused as to the bottomhole location of the 904. Our records show 1088 FNL & 114 FWL of Section 18(?), but your wellbore diagram shows a lateral wellbore length of 1,937 feet. What is the actual bottomhole location for this well?

Also, the bottomhole location of the 801, according to our records, is 1209 FNL & 4195' FWL, but your wellbore diagram shows a lateral length of 2,991'. Again, what is the bottomhole location of this well. (Footage, Section, Township and Range)

The other problem I've noticed with your application is that you are doing the Area of Review (AOR) with respect to the well's surface location. Since injection is going to occur at the bottomhole location, the reference point for the 1/2 mile AOR review should be the bottomhole location. It appears you will need to revise this part of the application to show all wells within 1/2 mile of these well's bottomhole location.

I hope to hear from you regarding these issues. You can either E-mail me or call me at (505) 476-3466.

Regards,

David Catanach
