Thanks Jerry,

My question is, are you going to measure each lease separately, or are you going to measure the total production from both leases?

Thanks,

DRC

David,

I am getting a DHC for each individual well to commingle the two pools using percentages based on testing of each pool, that will be provided to the OCD. The CTB is requested to commingle the two leases using meters for allocation.

Thanks,  
Jerry

Could you provide me with more details on how you guys are going to measure this commingled production. Your application is kind of vague.

Thanks,

DRC
