Describe Cause of Problem and Remedial Action Taken.\*  
A valve was properly shut on a frac tank and released produced water on the well pad. A vac truck was on site and able to get the majority of it cleaned up. It was isolated to an area on the well pad. SESI will do some initial sampling and we will come up with a plan for clean up based off of that for proposal.

Describe Area Affected and Cleanup Action Taken.\*

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
