Dear Ms. Bailey:

Enclosed please find the original application packet filed by Chesapeake Operating, Inc. on November 16, 2012 for the above-referenced non-standard location application. This application was inadvertently withdrawn while negotiations were underway with Energen Resources. Those negotiations have been successful and Energen has agreed to waive objections to the proposed non-standard location. Please find a copy of Energen's waiver enclosed with this letter. Because the only affected party has agreed to waive any objections to the non-standard location, Chesapeake would appreciate if this application could be reviewed and processed promptly. Please contact me should you have any questions or concerns.

Sincerely,

Re: Application of Chesapeake Operating, Inc. for administrative approval of an unorthodox well location for its McCloy Ranch 2 24 32 State Com 4H well in Section 2, Township 24 South, Range 32 East, N.M.P.M., Lea County, New Mexico.

Dear Ms. Bailey:

Chesapeake Operating Inc. (OGRID No. 147179) hereby seeks administrative approval pursuant to the provisions of Division Rule 19.15.15.13 NMAC for an unorthodox well location for Chevron USA, Inc.'s McCloy Ranch 2 24 32 State Com 4H well to be located in Section 2, Township 24 South, Range 32 East, N.M.P.M., Lea County, New Mexico. The proposed well is to be drilled horizontally at a surface location 100 feet from the South line and 660 feet from the East line of Section 2. The first perforations in the well will be at a point 330 feet from the South line and approximately 660 feet from the East line of the project area. The bottom-hole location will be 150 feet from the North line and 660 feet from the East line of Section 2. A 160-acre project area has been dedicated to this horizontal well comprised of the E/2 E/2 of Section 2.

Exhibit A is a land plat for Section 2 and surrounding sections that shows the proposed non-standard location of the McCloy Ranch 2 24 32 State Com 4H well in relation to adjoining units and existing wells. This location is unorthodox because this acreage is governed by the Division's statewide rules which provide for wells on 40-acre spacing units to be located no closer than 330 feet to the outer boundary of the spacing unit. The bottom-hole location of this well will be 150 feet from the North line of Section 2 for engineering reasons and is, therefore, closer to the section line than allowed by Division rules.

Exhibit B is the Well Location and Acreage Dedication Plat (Form C-102), which shows that the proposed McCloy Ranch 2 24 32 State Com 4H well encroaches on the spacing and proration unit to the North.

Exhibit C is a list of the affected parties. Pursuant to 19.15.4.12(A)(2)(c) NMAC, affected parties are those toward whom the non-standard location encroaches. Here, the proposed bottom-hole location encroaches to the North. The affected party is Energen Resources. A copy of this application with all attachments has been sent to Energen Resources at the address indicated in Exhibit C.

Your attention to this application is appreciated.
