If a Watercourse was Impacted, Describe Fully.* N/A		

Describe Cause of Problem and Remedial Action Taken.*
Plunger packing on pump gave out causing discharge to overrun catch tank. The majority of the release was contained within a lined berm. Less than 1 barrel leaked out. The impacted soils were excavated and taken to a NMOCD approved facility.

Describe Area Affected and Cleanup Action Taken.*
An approximate area of 10' X 15'. The spill occurred from a catch tank that is inside a bermed/lined. The majority of the liquid was contained within the lined berm, but a small amount did run over into the unlined area. These impacted soils were excavated and disposed of at an NMOCD approved facility.
Depth to Ground Water: 50-99' (80', Section 15, T19S-R25E, NMOSE), Wellhead Protection Area: No, Distance to Surface Water Body: > 1000', SITE RANKING IS 10. Based on the amount released, amounts recovered, that most of the release was in a lined berm and impacted soil being disposed of at an NMOCD approved facility, Yates Petroleum is requesting closure.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
