Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	
If a Watercourse was Impacted, Describe Fully.*		
Describe Cause of Problem and Remedial Action Taken.* Failure in a 2" steel production line caused 500 bbls of produced water to leak onto the ground. 50 bbls of produced water were recovered via vacuum truck.		
Describe Area Affected and Cleanup Action Taken.* Failure in a 2" steel production line caused 500 bbls of produced water to leak onto the ground. 50 bbls of produced water were recovered via vacuum truck. Remediation will be performed in accordance with an OCD-approved remediation plan.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOC D rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOC D marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOC D acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject: Jones Canyon 4 Fed 4

This is to inform you that Oxy Permian Primary had a spill of produced water at the Jones Canyon 4 Fed 4 on December 13, 2012. Oxy released 500 bbls of produced water, 50 bbls was recovered. Leak was due to failure in the 2" steel production line. Oxy will have BBC do some initial remediation, a C-141 to follow. BBC will delineate at a later date.
