If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

An oil tank overflowed at the Myox 29 State #3H Tank Battery due to a closed equalizer. The equalizer valve has been opened.

Describe Area Affected and Cleanup Action Taken.*

Initially 150bbbls were released from the oil tank and we were able to recover 148bbbls with vacuum trucks. This is a lined facility. All free fluid has been recovered, tank battery equipment has been cleaned, contaminated gravel has been removed, and fresh gravel has been added to the facility as necessary. This facility has been returned to its prior condition.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
