Re: Application of WPX Energy Production, LLC for administrative approval of an unorthodox well location and 80-acre non-standard spacing unit in the Basin-Mancos Gas Pool (97232), and approval of downhole commingling of production from the Nageezi Gallup Pool (47540) and the Basin-Mancos Gas Pool (97232), Section 16, Township 23 North, Range 8 West, N.M.P.M., San Juan County, New Mexico.

Dear Ms. Bailey:

WPX Energy Production, LLC, holds a state oil and gas lease that covers the S/2 of Section 16, T-23-N, R-8-W in San Juan County, New Mexico. WPX plans to drill the Lybrook 23-8-16 well as a horizontal well in the N/2 S/2 of Section 16 at a surface location 1491 feet from the South line and 248 feet from the East line (Unit I) and a bottom hole location 2300 feet from the South line and 340 feet from the West line (Unit L).

The SW/4 of said Section 16 is located in the Basin-Mancos Gas Pool (Pool Code 97232) and subject to the special rules for that pool created under Order R-12984. The remainder of Section 16 is located in the Nageezi Gallup Pool (Pool Code 47540), an oil pool in that is not listed in paragraphs (3) and (4) of Order 12984. WPX has been informed by Mr. Bill Hoppe in the Aztec District Office that because of the peculiar nature of the special rules for the Basin-Mancos Gas Pool, WPX needs to seek approval of (1) a non-standard well location in the N/2 SW/4 due to the differing setbacks in these adjacent pools, (2) a non-standard 80-acre spacing and proration unit in the Basin-Mancos Gas Pool comprised of the N/2 of SW/4 (Units K and L), and (3) commingling of the production from the two adjacent pools in the horizontal wellbore.

The special rules for the Basin-Mancos Gas Pool require that an oil well drilled within the area encompassed by these rules that is near an oil pool not listed in paragraphs (3) and (4) of Order 12984 must conform to the special rules for the Basin-Manos Gas Pool. See Appendix A to Order R-12984 (special rules) at Rule 1. These special rules require 320-acre spacing and that wells remain 660 feet from the outer boundary of the spacing unit. *Id.* at Rule 2.

The completed interval of the segment of WPX's proposed horizontal well located in the Nageezi Gallup Pool in the N/2 SE/4 of Section 16 will be at a standard location and will have dedicated to it standard spacing units for oil pools comprised of Units J and I. However, the remaining portion of the wellbore located in the Basin-Mancos Gas Pool in the N/2 SW/4 of Section 16 will have dedicated to it a non-standard 80-acre spacing unit comprised of Units K and L instead of the 320-acre spacing unit required by the special pool rules. In addition, the portion of the wellbore in the N/2 SW/4 will be at a non-standard location 340 feet from the outer boundary of the proposed unit instead of 660 feet required by the special rules.

Accordingly, to allow WPX an opportunity to efficiently and economically recover the reserves in these adjacent pools underlying the N/2 S/2 of Section 16, WPX respectfully requests that the Division issue one or more administrative orders granting the following relief:

- (1) Pursuant to NMAC 19.15.15.13.C, the Division approve a non-standard horizontal well location 2300 feet from the South line and 340 feet from the West line in the N/2 SW/4 of Section 16;
- (2) Pursuant to NMAC 19.15.15.11.B(2), the Division approve an 80-acre non-standard spacing and proration unit in the Basin-Mancos Gas Pool comprised of the N/2 SW/4 (Units K and L); and
- (3) Pursuant to NMAC 19.15.12.11.C(1), the Division approve the commingling of production from the Nageezi Gallup Pool and the Basin-Mancos Gas Pool in WPX's proposed horizontal well to be located in the N/2 S/2 of said Section 16.

As further support for this application, WPX has provided the following exhibits with this letter:

Exhibit A is a land plat of Section 16 and the surrounding sections showing the location of the Lybrook 23-8-16 in the N/2 S/2 of Section 16 and the adjoining spacing units and wells.

Exhibit B is the Well Location and Acreage Dedication Plat (Form C-102), which shows that as a result of the 660 foot setbacks required by the special rules for the Basin-Mancos Gas Pool, the proposed Lybrook 23-8-16 well encroaches on the spacing and proration units to North and West of the SW/4 of Section 16.

Exhibit C is copy of a completed form C-107-A (application for downhole commingling).

Exhibit D is a list of the affected parties for both the request for approval of the non-standard well location and for the request for the creation of a non-standard spacing unit

in the Basin-Mancos Gas Pool. A copy of this application with all attachments has been sent by certified mail to each of these affected parties advising them that if they have an objection they must file it in writing with the division within 20 days from the date the division receives this application.

Finally, since the ownership and percentages between the two pools involved are identical, there are no affected parties with respect to the request for downhole commingling. However, pursuant to NMAC 19.15.12.11.C(1)(c), a copy of this application has been provided to the New Mexico State Land Office by certified mail.

Your attention to this application is appreciated.

Sincerely,

Adam G. Rankin

If not, have all working, royalty and overriding royalty interest owners been notified by certified mail? Yes ☐ No ☐
Are all produced fluids from all commingled zones compatible with each other? Yes ☒ No ☐
Will commingling decrease the value of production? Yes ☐ No ☒
If this well is on, or communitized with, state or federal lands, has either the Commissioner of Public Lands
or the United States Bureau of Land Management been notified in writing of this application? Yes ☒ No ☐
NMOC Reference Case No. applicable to this well: _____

Attachments:

C-102 for each zone to be commingled showing its spacing unit and acreage dedication.
Production curve for each zone for at least one year. (If not available, attach explanation.)
For zones with no production history, estimated production rates and supporting data.
Data to support allocation method or formula.
Notification list of working, royalty and overriding royalty interests for uncommon interest cases.
Any additional statements, data or documents required to support commingling.

PRE-APPROVED POOLS

If application is to establish Pre-Approved Pools, the following additional information will be required:

List of other orders approving downhole commingling within the proposed Pre-Approved Pools
List of all operators within the proposed Pre-Approved Pools
Proof that all operators within the proposed Pre-Approved Pools were provided notice of this application.
Bottomhole pressure data.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.

Section 16, Township 23 North, Range 8 West, N.M.P.M.
San Juan County, New Mexico

Dear Mr. Stauffer:

QEP Energy Company ("QEP") is in receipt of notice of WPX Energy Inc.'s ("WPX") application to the New Mexico Oil Conservation Division for an unorthodox well location and non-standard spacing within Section 16, Township 23 North, Range 8 West. QEP has no objection to WPX's application as proposed.

If you require additional information, please contact Jennifer Bates at 303-308-3093.

Sincerely,
QEP Energy Company
