NATURE OF RELEASE

Type of Release	Oil & Produced Water	Volume of Release	10 Bbls	Volume Recovered	10 Bbls
Source of Release	Over Flow of Water Tank	Date and Hour of Occurrence	3/14	Date and Hour of Discovery	3/14/13
Was Immediate Notice Given?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required				
By Whom?	Date and Hour				
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No				

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.* Heater Treater Malfunction causing Oil and Water production to be sent to the 210 fiberglass open water tank. The water tank over-flowed causing a 10 bbl spill at base of tank. Est. volume was 3-4 bbls of oil and the remainder produced water.

Describe Area Affected and Cleanup Action Taken.* Area affected was around the base of the water tank w/in the fire wall of the tank battery. All liquid oil & water was vacuumed up and fresh pea gravel was placed over the affected area. a 60 mph wind caused oil to spray on a small portion of the pasture east of the tank battery. Dirt was dusted on the area.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
