If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*  
The weld on the Y failed. Cut out the bad connection and welded the polyline.

Describe Area Affected and Cleanup Action Taken.\*  
Initially 12bbls of produced water were released. We were able to recover 10bbls of produced water with a vacuum truck. All free fluids have been recovered. Concho will have the spill site sampled to delineate any possible contamination from the release and we will present a remediation work plan to the NMOCD for approval prior to any significant remediation work.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Mike,

Attached, please find three C-141s for releases on Concho Oil and Gas sites. We will be doing the initial assessment on these sites beginning Thursday, February 20, 2014 at 10 am beginning at the Myox 32 State #003. This email will serve as 48 hour notice of our intentions.

If you have any questions, I can be reached at 432-266-8375 or at my email [Darrell.moore@entechservice.com](mailto:Darrell.moore@entechservice.com). Thank you for your attention to this matter.
