Subject: Re: COG Operating - Jenkins B Federal Water Flood - Work Plan Approval Request

Ike,
This plan is approved as written. Please keep myself informed of any changing conditions. In the future we would like to see closure levels on all boreholes that are drilled.

BLM approval of this proposal does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health, or the environment, or if the location fails to reclaim properly. In such an event that location does not re vegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws/regulations.

Thanks

Gentleman,

Please find the enclosed Work Plan for the above reference spill site located in Eddy County, New Mexico. The spill have been assessed and the remedial recommendations are included in the work plan. I will mail you a hard copy of the work plan for your files. Once approved, Tetra Tech will schedule the soil remediation and notify you prior to implementing the work plan. Please let me know if you need additional information or call me if you have any questions

Subject: RE: COG Operating - Jenkins B Federal Water Flood - Work Plan Approval Request

Gentlemen,

OCD concurs with BLM approval for the proposed remediation. Please advise if the proposed excavation depths are not achieved. This barrier/liner installation will not facilitate considering this a "lined" facility for any future release events. It is OCD's understanding that this proposal is for two release events. OCD tracking numbers are as listed:

Date of release: 3/23/2012 * 2RP-1094 * 30-015-21945
6/26/2012 * 2RP-1217 * 30-015-20972

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.
