Describe Cause of Problem and Remedial Action Taken.* A 3 inch steel flow line 50' east of wellhead was found to be leaking causing 10 barrels of produced water to be released flowing off location down a draw. The line was shut-in, repaired and put back into service. No fluids were recovered. Talon/LPE was contracted to perform an initial site assessment and soil sampling.

Describe Area Affected and Cleanup Action Taken.*
The affected area is approximately 30' X 60'. This area impacted is down the draw.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
