NATURE OF RELEASE

| | | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|---------------------------------------------------------|
| Type of Release Spill Produced Water | Volume of Release 255 BBLS | Volume Recovered 250 BBLS |
| Source of Release Produced water line | Date and Hour of Occurrence May 5, 2014 7:00AM | Date and Hour of Discovery May 5, 2014 7:00AM |
| Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required | If YES, To Whom? Joah Weidemann; Devon Energy Assistant Production Foreman | |
| By Whom? David Medlock with RW Trucking | Date and Hour 7:00 AM | |
| Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No | If YES, Volume Impacting the Watercourse. N/A | |
| If a Watercourse was Impacted, Describe Fully.* N/A | | |
| Describe Cause of Problem and Remedial Action Taken.* The leak was in the produced water line coming from the Cotton Draw Unit 76 location to the Cotton Draw Unit 65 SWD. The check valve on the produced water header was bad. The line was isolated to determine the exact cause of the problem and the well was shut in. Once it was determined what the issue was the leaking area was dug up and repairs were made. The line had a hole in it as a result of corrosion. | | |
| Describe Area Affected and Cleanup Action Taken.* The produced water leak was contained within the earthen berm surrounding the location. On May 5 a vacuum truck recovered 250 BBLS of the 255 BBLS spilled. The area where the spill occurred was back dragged. Soil samples will be taken to determine if remediation is needed. | | |

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Good afternoon,

Attached is the initial C141 and photos for the 255 BBLS PW Spill that occurred at the Cotton Draw Unit 65 SWD on May 5, 2014. Hard copies have been mailed to your office.

Please let me know if I can be of any further assistance.

Have a wonderful rest of your week

Sandy Farley
