NATURE OF RELEASE

Type of Release : Produced Water	Volume of Release : 20 bbls	Volume Recovered: -0- bbls
Source of Release : Transfer Pump	Date and Hour of Occurrence: 5/13/2013 Unknown	Date and Hour of Discovery: 5/13/2013
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? OCD/Mike Bratcher & BLM/Jim Anos	
By Whom? CJ Summers (Oxy)	Date and Hour : 5/15/2013 1:38 pm	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully

Describe Cause of Problem and Remedial Action Taken.* On May 13, 2013 the triplex transfer pump line was found to be leaking causing a release of 20 barrels of produced water. No fluids were recovered. The triplex transfer pump was subsequently replaced. The fluid from this release flowed north and west across the location. It then ran off of the northern side of the location and flowed into the pasture measuring approximately 280-feet long.

Describe Area Affected and Cleanup Action Taken.* Talon/LPE was contracted for the correction of this release. Talon personnel mobilized to the site to begin excavation of the impacted area in accordance with the approved work plan. The impacted soil on the location was excavated to a depth of 4-feet deep and transported to a NMOC D approved solid waste disposal facility, Lea Land, LLC, pursuant to NMOC D stipulations. A 1-foot layer of clay was backhauled from a private pit and then backfilled to grade using new caliche backhauled from a local borrow pit and the location will be reconstructed. A clay liner was installed in the excavated flow path off the location and on the unvegetated portion of the old pit area. The area was backfilled with clean sandy top soil and contoured to match the surrounding terrain. The area off location was seeded on November 21, 2013 with BLM #2 seed mix.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOC D rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOC D marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOC D acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal state or local laws and/or regulations.
