Upon arrival of the pumper a small hole was discovered on the water leg of the heater treater. Following the discovery of the release, the heater treater was drained and isolated in order to make repairs.

Describe Area Affected and Cleanup Action Taken.\*

Affected area- Caliche inside the separation equipment area. The release also impacted a 5 ft. by 25 ft. area of pasture to the east of well pad. Contaminated soil will be dug up and hauled off and backfilled with clean material. Final remediation will be conducted in accordance with NMOCd's Guidelines for Remediation of Spills, Leaks, and Releases.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCd rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCd marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCd acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
