The well pressured up between back pressure valve and stuffing box causing packing to blow out. The packing was replaced and vacuum truck dispatched to pick up fluid.

Describe Area Affected and Cleanup Action Taken.*

The release was mostly contained on the lease pad with approximately 200 square feet in pasture. The area will be delineated.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
