NATURE OF RELEASE										
Type of Release: produced water						Volume of Re	lease: 30 bbls	Volume R	Volume Recovered: 28 bbls	
Source of Release: water transfer pump						Date and Hou	r of Occurrence:	Date and	Date and Hour of Discovery:	
Was Immediate Notice Given?						3/4/14 3/4/14				
☐ Yes ☐ No ☐ Not Required										
By Whom? Bradley Blevins Was a Watercourse Reached?						Date and Hour: 3/4/14 @ 08:30 If YES, Volume Impacting the Watercourse:				
Was a Watercourse Reached? ☐ Yes ☑ No						Not Applicable				
Depth to Water. ~80 ft bgs										
If a Watercourse was Impacted, Describe Fully.* Not Applicable										
Describe Cause of Problem and Remedial Action Taken.* Approximately 30 bbls of produced water were released when a valve on the water										
transfer pump was found open and released 30 barrels of produced water to the secondary containment and two barrels of produced water escaped the containment. A vacuum truck was dispatched to pick up any free standing liquids. There were approximately 28 bbls recovered. An Emergency										
Response Team arrived at the release area and began continuous abatement of the impacted area. Visibly stained soil was excavated and hauled										
away for disposal at a state approved facility. Describe Area Affected and Cleanup Action Taken.* Approximately 5,700 square feet of surface area was impacted by the release. Soil samples.										
will be collected from release area and submitted to Cardinal Laboratories for testing. Upon receipt of laboratory analytical data from soil samples.										
collected during delineation operations, EPI will prepare and present a Remediation Proposal for NMOCD approval. Cleave of Fig. 1 hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules										
and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may										
endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water,										
surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility										
for compliance with any other federal, state, or local laws and/or regulations.
