Describe Cause of Problem and Remedial Action Taken.\*

Erosion of a nipple in the header caused 5 bbls of oil and 15 bbls of water to leak onto the ground from a 2" steel flow line. No fluids were recovered and the nipple was replaced.

Describe Area Affected and Cleanup Action Taken.\*

The affected area is approximately 110' x 25' inside the firewall. This leak is almost completely contained inside the firewall with only a very small portion of the leak coming off the west side. Remediation will be completed in accordance with a remediation plan approved by NMOCD and the BLM.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
