NATURE OF RELEASE Type of Pologogy, PRODUCED WATER Volume of Pologogy, PRODUCED WATER Volume of Pologogy, PRODUCED WATER													
Type of Release: PRODUCED WATER Source of Release: SWD LINE										me Recovered 50bbls and Hour of Discovery			
Source of Release. SWD Life.						1				@ 11:20 AM			
Was Immediate Notice Given? ☐ Yes ☐ No ☐ Not Required						If YES, To Whom? MATT STOUDT							
By Whom? WATSON CONSTRUCTION						Date and Hour 5/15/14 @ 11:30 AM							
Was a Watercourse Reached? ☐ Yes ☒ No						If YES, Volume Impacting the Watercourse.							
If a Watercourse was Impacted, Describe Fully.*						1							
Describe Cause of Problem and Remedial Action Taken.* The SWD line was hit by road bore crew causing a release of 50 barrels produced water. The line was isolated and repaired. Approximately 95 percent of the release remained in the bell holes and the rest flowed down caliche road. A vac truck was immediately called to the location and recovered 50 barrels. Talon/LPE was contacted for initial site assessment and soil sampling to generate a work plan.													
Describe Area Affected and Cleanup Action Taken.* On July 25, 2014 a composite 20 millimeter liner was installed under the pipeline at a depth of approximately 6-feet deep under the pipeline. The edges of the liner were keyed into a trench excavated 3-feet deep at the boundaries of the bell holes. New soil was transported to the location from a local borrow pit and placed over the top of the 20 millimeter liner. No further actions are required.													
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. Invaddition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
