## NATURE OF RELEASE

Type of Release <b>LOPC from above ground tank into lined secondary containment</b>	Volume of Release <b>est 5bbl</b>	Volume Recovered <b>5bbl (excavated)</b>
Source of Release <b>Engine skid drain tank</b>	Date and Hour of Occurrence <b>5/16/14</b>	Date and Hour of Discovery <b>5/17/14</b>
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?	
By Whom?	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	
If a Watercourse was Impacted, Describe Fully.* <b>N/A</b>		
Describe Cause of Problem and Remedial Action Taken.* <b>On 5/16/2014, an engine skid drain tank overfilled and approximately 5bbl of used oil and condensate spilled into lined secondary containment. Upon inspection, the integrity of the top of the tank was found to be compromised, and a replacement tank was ordered on 5/18/2014. The old tank was removed on 6/16/2014 to begin removal/replacement of contaminated secondary containment gravel. Upon removal of the secondary containment gravel, a tear in the secondary containment liner was discovered. The liner was removed and excavation began to determine the extent of historic contamination beyond secondary containment.</b>		
Describe Area Affected and Cleanup Action Taken.* <b>Approximately 320 yd<sup>3</sup> were excavated from the area surrounding and underneath the original bermed containment. The excavated material was transported to Lea Land, LLC for disposal on 7/18/14. Analytical samples taken 7/10/14 show that Chlorides, TPH, BTEX, and Benzene are below the levels outlined in "NMOCD Guidelines for Remediation of Leaks, Spills, and Releases". The area has been backfilled with clean soil, re-lined, re-bermed, and a new tank has been ordered and will be placed on site.</b>		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
