Describe Cause of Problem and Remedial Action Taken.* West Suction produced water tank over filled due water extraction well producing into the tank unexpectedly. Operations immediately shut in production to minimize volume released.					
Describe Area Affected and Cleanup Action Taken.* Spill area was approx. 8' by 8' area just north and north west of the West Suction Tank. Vacuum Truck called out to vacuum up standing fluids and hydrovac excavated top layer of soil approx. 8-12". Vacuum Truck Recovered 16.7 bbls of fluid. Next step is to take samples to determine effectiveness of local remediation and possibly turn remediation over to the Chevron Environmental Management Company.					
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
