Describe Cause of Problem and Remedial Action Taken.*

Stress on a 1" stainless steel injection line at a remote header caused a leak of 100 bbls of produced water to spill onto the ground. A vacuum truck recovered 50 bbls of produced water and the line was repaired or replaced.

Describe Area Affected and Cleanup Action Taken.*

The affected area is approximately 8' x 650' on and off location. Remediation was completed in accordance with the remediation plan approved by Geoffrey Leking via email on 07/01/2014 and approved by Jennifer Van Curen of the BLM via meeting on 06/30/2014.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
